FOR IMMEDIATE RELEASE PROTEK POWER NORTH AMERICA OPENS HUDSON, MA OFFICE

Protek Power North America (www.protekwpowerna.com) announces the opening of their new Hudson, MA facility. Protek Power is a leader in the design, manufacturing, and sales of world-class power supplies for the Medical and ITE markets. The Hudson facility will provide sales and technical engineering support, as well custom product design engineering, on-site diagnostic testing, and warehousing.

“The North American power conversion customer base continues to seek the cost efficiencies and quality of Far East manufacturing, balanced with immediate, local sales and technical support,” said Frank Rene, Vice President of Protek Power North America. “Protek Power North America accomplishes this, while providing a customer oriented power supply selection experience, with emphasis on the individual application needs and cost targets of each client”.

The new office’s address is 43 Broad Street, Hudson, MA, 01749. The main telephone number is 508-567-9615 and the fax number is 508-567-9601. Email contacts are the Technical Group at tech@protekwpowerna.com and the Sales Group at sales@protekwpowerna.com.

About Protek Power

For over 22 years, Protek has provided power solutions to the worldwide marketplace. Founded upon the principal of designing quality power conversion products at competitive prices, the product family includes thousands of AC/DC power supply solutions, for both the medical electronics and information technology industries. Power ratings range from 25W to 650W, with mechanical packaging in open frame, U-channel, enclosed and desktop types. Products are carefully designed and are certified to the latest international safety, EMI, and environmental criteria.

Requests for modified standard and full custom solutions are welcomed and typically handled with little or no additional engineering costs.

In addition to the Hudson, MA office, Protek Power has network of North American Sales Representatives and Distributors. Far East operations are based in Taiwan and China.
